SKILLS

Backend: REST API, JavaScript/TypeScript, NodeJs, ExpressJs, MondoDB, MySQL/PostgreSQL, AWS, Redis, ElasticSearch, Gravitee, Grafana, Socket.io, NestJs, Swagger, Unit Testing, Mocha, Chai, JWT, Oauth, RabbitMQ.
Frontend: NextJs, Reactjs, Redux, Tailwind CSS, HTML/CSS.
Tools: Git/GitHub, Cloudinary, Docker.

EXPERIENCE

Monotype | *Software Developer Trainee*   May 2024 – May 2025
Involved in various backend tasks, such as writing and maintaining RESTful APIs.
Implemented Grafana dashboards for real-time monitoring and performance insights.
Worked with AWS services like S3, SQS, SNS, DynamoDB, and Lambda to build scalable, event-driven solutions.
Contributed to the migration from Apigee to Gravitee API Gateway by creating and configuring multiple API proxies, resulting in significant infrastructure cost savings.
Ensured code reliability and coverage by writing unit tests using Mocha and Chai.
Identified and resolved security and code quality issues using SonarQube and Checkmarx.

Plaxonic Technologies | *FullStack Developer Intern*   Dec 2023 – Feb 2024
Worked on live project Herbal Cart, an ecommerce app, and developed web pages.

EDUCATION

Jamia Millia Islamia University   Oct 2021 – Dec 2023
M.Tech in Electronics and Communication Engineering   *91%*

B.I.T Sindri   June 2017 – June 2021
B.Tech in Electronics and Communication Engineering   *85%*

PROJECTS

Social Media App | *NextJs, MongoDB, Tailwind, Stripe, Clerk, Cloudinary*   Github Demo
- Built website with authentication powered by Clerk.
- Built CRUD functionality for posts with like and save features.
- Implemented follow/unfollow functionality, user and post search, and profile displays with associated posts.

E-Commerce NEXT | *Next.js 14, Stripe,Tailwind, Material.ui and Sanity.io*   Github Demo
- Added features such as product listing, detailed product information and Checkout with Stripe.
- Advanced State Management of the entire app. using React Context API.
- It is a web app. with Modern design, animations and cart functionalities.

E-Commerce MERN App | *React.js, MongoDB, ExpressJs, NodeJs, Material UI,Cloudinary.*   Github Demo
- Admin Panel for seamless product and user management.
- Implemented authentication, product search, and filtering functionalities.
- Developed product upload feature with image storage and management.

Home Rental Application | *React.js, MongoDB, ExpressJs, NodeJs, Material UI.*   Github Demo
- Combined JWT authentication with Bcrypt encryption for secure sign-up and log-in.
- enabled features like property listing creation, booking management, and search functionality.
- Employed Redux for state management, facilitating Wishlist management.
